

'How To' upload your own personal Web Page

FOR MAC USERS

If you don't have "Fetch", you can a trial copy from <http://fetchsoftworks.com/>

Start the program "Fetch", by double clicking the icon.

A window will appear, as shown below.

In the "Host" area type in	www.apex.net.au
In the "User ID" area type in	Your User Name
In the "Password" area type in	Your Password

New Connection

Make a new connection to this FTP account:

Host:

User ID:

Password:

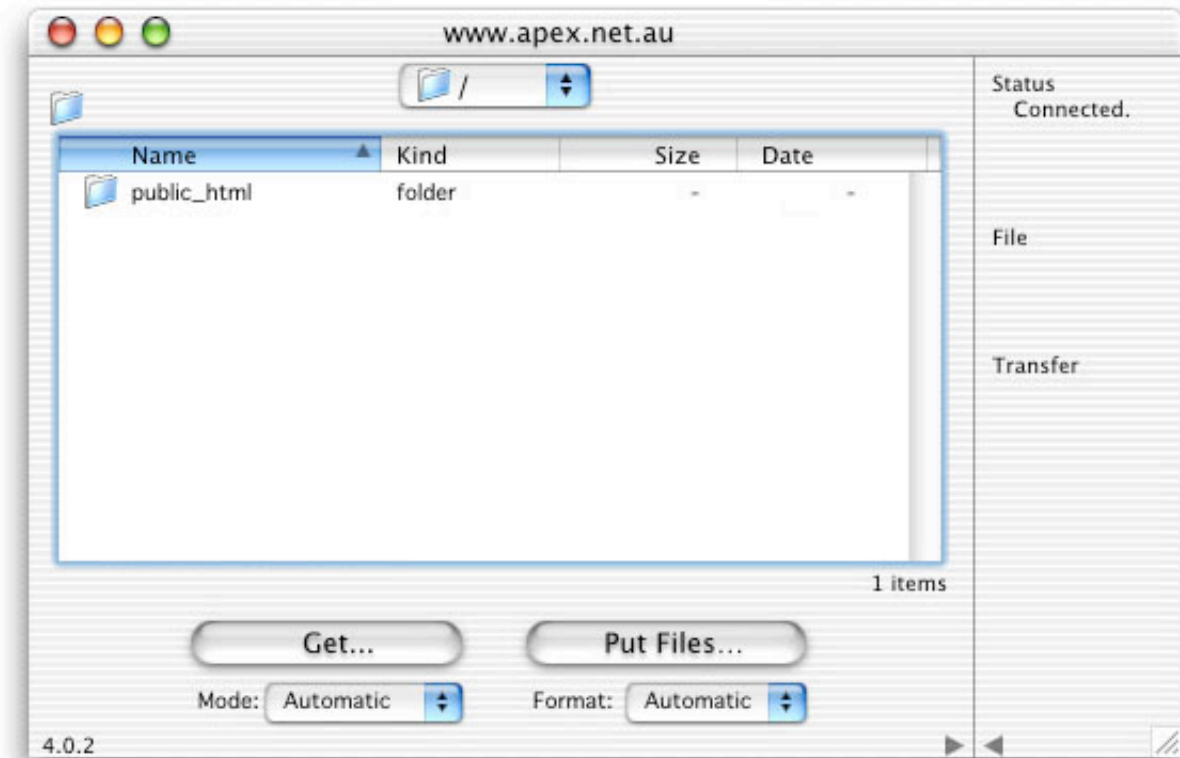

Add to Keychain

Shortcuts:

Press "OK"

Now another window will appear, as shown below.

Double Click on the folder marked "public_html". Put your "Personal Homepage" in there, by dragging the contents into the window.

NOTE: The first page of your homepage, should be named "index.html". Therefore, your Homepage address will be:

http://www.apex.net.au/~YOUR_USER_NAME
