

Setting up Dial-up for Mac OS X

- Click on the Apple symbol
- Select System Preferences
- Click on Network
- Change Show to Show Internal Modem
- Select TCP/IP, set Configure to PPP
- Select the PPP tab
- The Provider is APEX
- The Telephone Number is either 02 6245 1500 or 02 6245 1501 (max plans)
- Type your username and password
- Tick Save Password
- Select the Modems tab
- Ensure that the modem is correct (apple internal modem)
- Tick Show Modem Status in the menu bar
- Click on Apply Now
- A Telephone icon will appear in the top right hand corner of the screen
- click on this icon, then click on connect
